Professional Profile

Full Stack Developer (MEAN) with experience in building web applications using Angular, Node.js, Express, and databases such as MongoDB and PostgreSQL.

I have developed complete systems such as an e-commerce platform and a POS system with inventory control, JWT authentication with role management (admin/seller), and REST API consumption.

Experience in development and maintenance of institutional applications, implementation of user interface (UI) improvements, and process optimization. I work under Scrum methodology and focus on writing clean, scalable, and maintainable code.

Professional Experience

Web Developer

Universidad Internacional de Aguascalientes

March 2025 – April 2026

- Developed and maintained an institutional web application using Angular
- Integrated frontend components with a PostgreSQL-based backend
- Improved UI/UX, enhancing usability and user interaction
- Resolved technical issues and provided support for internal systems
- Collaborated with multidisciplinary teams on digital projects

Full Stack Developer

Inadaptados

2024 – 2026

- Developed a full stack e-commerce application using Angular, Node.js, Express, and MongoDB
- Implemented RESTful APIs (CRUD) for product, user, and order management
- Built a POS system with inventory control and business logic for sales operations
- Implemented JWT authentication with role-based access control (admin/seller)
- Applied backend validations and handled errors in API endpoints
- Used Git and GitHub for version control and collaborative development
- Worked under Scrum methodology, participating in sprints, planning, daily meetings, and pull requests

Projects

Cafeteria POS System (Full Stack)

- Developed a point-of-sale system using Angular, Node.js, Express, and MongoDB
- Implemented business logic for automatic discount calculation
- Managed inventory with real-time stock updates
- Generated sales tickets and maintained transaction records
- Integrated JWT authentication and role-based route protection

Full Stack E-commerce

- Developed an online store with product catalog, shopping cart, and user management
- Implemented client-side cart logic using state management
- Consumed RESTful APIs for CRUD operations
- Handled user authentication and authorization
- Integrated Angular frontend with Node.js backend

Enrollment Management System and Institutional Website Redesign I

<https://www.iinternacional.edu.mx>

- Redesigned the institutional website, migrating from Next.js to Angular
 - Implemented a dynamic interface for degree program visualization, replacing static PDF files
 - Developed an enrollment form connected to a PostgreSQL database, replacing manual Excel-based processes
 - Integrated backend services for data persistence and applicant record management
 - Built an administrative panel with filtering, search, and data organization functionalities
 - Resolved critical production issues related to external image loading by implementing internal storage solutions
 - Improved lead acquisition flow by automating registration and reducing manual processes
-

Technical Skills

Frontend: Angular (CLI, Reactive Forms, Routing), Component-based architecture, TypeScript, JavaScript (ES6+), RxJS (Observables, Subscriptions, Basic Operators), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, REST API Integration (HTTPClient), Cross-browser compatibility

Backend: Node.js, Express, RESTful APIs, JWT Authentication, Role-based Access Control, Error Handling, Debugging

Databases: MongoDB, PostgreSQL

Other: Advanced English, Client-side State Management (Local Storage), Unit Testing (Jasmine, Karma – basic), End-to-End Testing (Cypress – basic), Git (Branching, Pull Requests), Scrum, Salesforce Platform Development

Education

Bachelor's Degree in Design and Content Production

Cuauhtémoc University, Aguascalientes Campus

2021 – 2024

Full Stack Developer (MEAN)

Inadaptados

2024 – 2026

Master's Degree in Teaching Competencies for Digital Transformation

2025 – 2026

Certificates / Training

Certified Junior Angular Developer -

<https://certificates.dev/c/a1e70b4c-35b2-47b2-b7e3-2e15dd06010b>

Salesforce Platform Development (Trailhead – Salesforce Platform Developer Trailmix)

Profile: <https://www.salesforce.com/trailblazer/odfagwrgiayOreulat>

Completed an extensive Salesforce Platform Developer Trailmix covering application development on the Salesforce Platform, including both declarative and programmatic development approaches.

Key areas of knowledge include:

- Salesforce data model design (objects, relationships, validation rules, and formulas)
- Apex programming fundamentals (DML operations, SOQL/SOSL queries, triggers, asynchronous processing)
- Salesforce security model (sharing rules, roles, profiles, and server-side security principles)
- Declarative automation (Flows and approval processes)
- Lightning UI development (Lightning Web Components, Aura components, and Visualforce basics)
- Salesforce DX development workflow (CLI, scratch orgs, deployment, and debugging tools)
- Testing and debugging (Apex unit testing, debug logs, and Replay Debugger)
- Platform architecture fundamentals including event-driven concepts (Platform Events basics)

Gained hands-on experience using Salesforce Trailhead Playground and Salesforce DX tools to simulate real-world development workflows.
